Name of the Capstone Project Mentor: Gaurav Aggarwal(E15876)

Capstone Project Title: IoT Based Vehicle Accident Detection and Tracking System

A brief overview of the Capstone Project:

This project designs an advanced vehicle safety system with features like an anti-sleep alarm, smoke detector, real-time alcohol detection, and automatic accident notifications to contacts and emergency services. It aims to enhance road safety, reduce accidents, and ensure timely assistance in emergencies

Capstone Project Objectives:

1. Integrating Accident Notification System
2. Anti-Sleep Alarm for Drivers
3. Smoke & Alcohol Detection

Expected Outcomes of the Capstone Project
